Generic File

Wait for full Json

NO

Is full json available?

yes

* Send PR for FULL.JSON and Create a copy for start generic File

innersour...
* create a...

STEPS

Create a "generic" JSON file and apply Rusty's scripts

./build-database/remove-long-running-testcases.py

./build-database/remove-passed-and-unchanged-testcases.py -h

./build-database/remove-tagged-testcases.py
--json tmp2.json --platform SRF --tags

Workload List
Verify if workloads are available for current release

STEPS

* Once you have the list of workloads from
  the workloads have the tag for curre
* Take in account that some workloads hav
  of docker image, you can sure of the na
  docker image workload documen
  "https://github.com/intel-
  innersource/applications.benchmarking.ben
  hero-features/tree/master/work
  * go to "https://amr-
  registry.caas.intel.com/harbor/projects/15
  * search the name of you docker image,
  contains the correct tag.

a  Bug in "https://github.com/intel-
cations.benchmarking.benchmark.platform-
hero-features/issues/"

NO

all workloads from full json
have current release ?

YES

Huge Pages Analysis

Do an analysis of Huge Pages, that we can't support

and removed it

HAS-SETUP-NVIDIA-CUDA: required

HAS-SETUP-QAT-V200: required

HAS-SETUP-CEPH-STORAGE: "required"

Do an Anal
in order to crea
the lists of tests for

HAS-SETUP-HUG

"hugepages=2048

GNR and SRF
```

https://github.com/intel-
ce/applications.infrastructure.services-framework.pre-
silicon-triage/blob/main/WORKFLOW.md
a separate list with all the tests that we are removing

full.json verify if
ent release.
ve different name
me verifying the
ntation.

nchmark.platform-
kload"

31/repositories"
and verify that

lysis of the Huge Pages that we can support
ate their correct checkpoint, remember separate
execute it with their corresponding checkpoint image

GEPAGES-1048576kB-64: required

8"

HAS-SETUP-DLB: required

"HAS-SETUP-NVIDIA-CUDA: required"

HAS-SETUP-DPDK: required

HAS-SETUP-ACC100: required

HAS-SETUP-CENTOS7: required

HAS-SETUP-KERNEL-RT-3-10: required

HAS-SETUP-DISK-MOUNT-1: required

HAS-SETUP-INFERENTIA-NEURON: required

HAS-SETUP-MODULE-VFIO-PCI: required

HAS-SETUP-NIC-25G: : required

HAS-SETUP-DSA: required

Identify Special

Numanodes

SGX

Needs more cpu

SKIPPED TEST: Do an analysis of the tests that we need removed
and create a text file with this tests in order to change the status to skipped

List of tests that have no current tag (include it until the tag are available)

NUMANODES

List of tests that were removed with the Rusty's scripts

Huge Pages not supported

Tests that need more than 1 Node :

we identify the tests that needs more than 1 node with the tests name.
3_nodes , 3_data_node, 3n, 2n

- - - - - - - - - S

Create Images with correct checkpoint

GNR_R2227_8C_HP2048.ckpt

GNR_SGX_2227.ckpt

GNR_R2227_4C_HP1G.ckpt
